PROJECTS

❖ BGLC (Bank Guarantee and Letter of Credit)

- In this application, there is a "Bank limit" section where you can manage all banks and define their respective allocated limits. Based on these predefined limits, the banks disburse funds to individuals in multiple instalments.
- In this Project, I contributed to both front-end and back-end development. On the front-end, I created several pages, while on the back-end, I developed APIs and handled various operations using Node.js and MongoDB.

❖ DDMS (Digital Document Management System)

- This project is developed using the MEAN Stack (MongoDB, Express, Angular, Node.js) and functions as a cloud storage solution, enabling both users and admins to securely store and manage their data.
- It supports a wide range of file types, including Excel sheets, Word documents, PowerPoint presentations, images, and more, offering seamless file organization and accessibility from any device.

❖ INDIAN MARKET (E-Commerce Web Site)

- This e-commerce website includes two portals: one for Admins and one for Users. Admins can manage products by adding, updating, and removing items as needed.
- Users can browse the product catalogue, view details, and make purchases, ensuring a smooth and efficient shopping experience.
